

DESIGN/DRAFTING:

- Oil and Gas Equipment
- Mechanical Equipment
- Overhead Cranes
- Paving Equipment
and much more!

From concept to completion, you can rely on our design and drafting services and management capabilities to get your job finished with QUALITY and EFFICIENCY.

We provide your company with fully engineered models, drawings, and project management.

DESIGN AND DRAFTING

We take your design ideas and drive them to quality finished product with a full compliment of design, modeling, and drafting.

Flexibility is one of our core strengths. Not only do we design products from your initial concepts, we can also take partially designed projects and carry them to completion so that you can move on to other things.

We provide:

- Initial Concept Design
- Design Upgrades/Updates
- Drawings for previously completed designs

Whatever your needs and specifications, we can provide you with finished, quality products.

PROJECT MANAGEMENT SUITE

We offer a full project management suite that enables us to complete your engineering needs from start to finish.

ANALYSIS

Using FEA software, we analyze and provide reporting on the mechanical integrity of the products that we design and provide, as well as existing products that need to be proven out.

P.E. SERVICES

We provide P.E. services for stamping and calculations.
